

iMediaTouch now available in 3 fully supported versions

iMediaTouch PixPlus: Our new addition to our automation product suite, perfectly suited for smaller commercial stations, educational institutions, LPFM operators, transmitter back-up installations and other applications where a full featured, larger solution is not required.

iMediaTouch Version 4: Our well established, full featured radio automation solution for all sizes of radio stations and groups.

iMediaTouch Enterprise: Our latest generation of radio automation. Advanced features include SQL content management, customizable screen layouts, user defined profiles, advanced fault tolerance and much more.
